## DAHLIA CULTURE

Plant tubers 4 to 6 inches deep and about 3 feet apart in well worked soil, keep top soil stirred, water only in dry weather, then soak the soil about once a week. Do not sprinkle the foliage, do not plant in dense shade as they like plenty of sunlight.

After killing frost dig roots carefully, store in a cool cellar where they will not freeze, laying the clumps with the stem down if possible, this will reduce stem rot. If your cellar is too dry store the roots in a box and cover with sand, or soil, peat moss is also very good if you have it. Cut the roots apart any time the eyes can be seen, leaving one eye to each division. The tops do not have to be cut off immediately after they are frosted.

Wishing you a successful year.

# DAHLIA TUBERS

All prices herein are for strong roots, grown under natural conditions and will do well anywhere. All orders for \$1.00 or more will be sent post paid. Orders under \$1.00 must include 10 cents for postage and packing.

Roots can be sent any time the weather is above freezing.

GREEN PLANTS of those varieties marked (\*) can be furnished at half price, but cannot be sent out until about May 1st. For safety add 15 cents for special delivery on plant orders over the third postal zone.

**This List Cancels All Previous Prices.**
